Portfolio — GitHub: akshay0524 — LinkedIn: akshay-k-b45652309/

Career Objective

Computer Science Engineering undergraduate with strong academic performance and hands-on experience in web development and AI-based projects. Passionate about problem-solving, innovation, and responsible use of technology. Actively seeking to learn, contribute, and grow through the Infosys InStep program by working on impactful, research-oriented projects under global mentorship.

Education

B.Tech — Computer Science Engineering

2023–2027

Vignan Lara Institute of Technology and Science (VLITS) — CGPA: 9.06/10 (till 5th Semester)

Intermediate (Class XII)

2021–2023

Sri Chaitanya Junior College — 94.8%

Technical Skills

Languages: JavaScript (ES6+), Python, Java, C

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT

Databases: SQL, MongoDB, Mongoose

CV & AI/NLP (Beginner): OpenCV, MediaPipe, Hand Gesture Recognition, LLM APIs

Tools & Deployment: GitHub, Postman, Vite, Vercel, Render

Core CS: DSA (Basics), OOPS, DBMS

Academic & Personal Projects

1. Virtual Mouse Using Hand Gesture Recognition

Python, OpenCV, MediaPipe

- Designed and implemented a virtual mouse controlled entirely through hand gestures using a webcam.
- Utilized MediaPipe for hand landmark extraction and OpenCV for real-time image processing.
- Enabled cursor movement, click, and scroll functionalities using finger distance and gesture patterns.
- Optimized performance for smooth and responsive user interaction.
- GitHub: github.com/akshay0524/VirtualMouse

2. Event Management System (EMS)

React, Node.js, Express, MongoDB

- Built a full-stack event management solution for event creation, registrations, and user management.
- Implemented role-based access for administrators and participants with secure REST APIs.
- Live Demo: akshay0524.github.io/akeventz

3. AI-Integrated Real-Time Chat Application

React, Node.js, Socket.IO, LLM API

- Developed a real-time chat application with secure user authentication and message persistence.
- Integrated an AI assistant to provide intelligent, context-aware responses within chats.
- Used Socket.IO for real-time communication and MongoDB for storing conversations.
- Live Demo: akshay0524.github.io/Hanasu

Internships/Experience

1. Frontend Developer — Client Project (Indiana)

2026

PupWorld — pupworld.com

- Collaborated with an American client to redesign and modernize the PupWorld website.
- Rebuilt UI components and improved responsiveness across mobile and desktop devices.
- Live Demo: akshay0524.github.io/pupworld

2. BCG GenAI Job Simulation

Virtual Internship

- Completed Boston Consulting Group (BCG) GenAI job simulation focused on real-world AI use cases.
- Worked on prompt engineering, AI-powered business solutions, and ethical AI considerations.
- Applied Generative AI concepts to consulting-style problem-solving scenarios.

Achievements & Certifications

- 3× Hackathon Winner** — College-level full-stack and AI hackathons.
- Top 5** — **Mindsprint Hackathon** among 200+ teams nationwide.
- Recognized for excellence in competitive programming and project innovation.
- CISCO Cybersecurity — NPTEL Programming in JAVA — Full Stack Web Development

Soft Skills

Time Management — Public Speaking — Team Player — Fast Learner

DECLARATION

The details provided above are accurate and complete to the best of my knowledge and belief.
